## Remis Mechanical Maintenance Program

Every building is unique and deserves a Maintenance Program custom tailored to its construction. At Remis, we offer a Mechanical Maintenance Program suitable to your needs and budget. After performing a site inspection of your equipment and discussion, we will prepare a customized Maintenance Program to ensure that all of your needs and concerns are addressed. The annual program will consist of monthly, bi-monthly or quarterly site visits. It can also be limited to the basic operation and maintenance of mechanical equipment, or it can include a wide range of tasks such as backflow testing or yearly teardown and inspection of gas equipment...just to name a few.

Providing you with the highest level of maintenance for your Mechanical Equipment and making you our #1 Priority is our promise.

## Trusted Since 1991

Remis has been proudly serving the Calgary area for over 20 years. We pride ourselves in providing prompt, efficient and quality service at an affordable cost. Our highly trained and fully qualified team of service technicians, plumbers and mechanical trades people are available 24 hours a day, 7 days a week.
